

IxNetwork—Routing and Switching Test Solution

Validate Internet Backbone Routing and Switching

Problem: Existing Network Strained with Increased Bandwidth Demand and Complexity

Routing and switching are fundamental Internet backbone infrastructure, providing Ethernet and IP underlay for value-added overlay networks and services. To handle the heterogeneous requirement of the Internet, a set of protocols provide Layer 2 and Layer 3 connectivity across different networks, apply traffic engineering aspects to optimize routing, connect multiple administration domains with policy control, implement fast failure detection and recovery mechanisms, handle abnormal condition, etc. These are all essential to provide a scalable and highly available backbone network. With exploding Internet users and services, as well as the complexity of the network, it is critical to ensure the core network infrastructure can be scaled out with robustness to meet today's business demand with satisfied service level agreement (SLA).

Solution: Comprehensive Testing to Ensure Highly-Available and Robust Network Infrastructure

The IxNetwork Routing and Switching test solution provides a rich set of routing and switching protocol emulations to qualify performance at Internet scale, convergence and failover, restart capability, as well as benchmarking suites for data forwarding performance.

It enables users to stress devices and networks under realistic conditions, measure key performance indicators (KPIs) to meet deployment requirements, validate IPv6 readiness of core network infrastructure to ensure smooth network upgrade and new network creation supporting value-added services.

Highlights

- Test Internet infrastructure under realistic conditions with mixed routing and switching protocols running simultaneously
- Test Internet scale with emulation and real Internet routing table import
- Ensure core network high availability by validating the robustness of devices handling abnormal behaviors, through session and route flapping test, as well as long duration test
- Qualify the ability of fast failure detection and sub-second recovery
- Validate graceful restart and routing convergence capability to reduce network instability and downtime
- Assess network readiness to handle mixed IPv4 and IPv6 Internet routes and traffic
- Benchmark data forwarding performance to ensure satisfied latency/jitter and other KPIs
- Characterize performance of multicast infrastructure to efficiently deliver multicast traffic with replication

Key Features

- Emulates IGP speaking routers, supporting ISIS, OSPF, EIGRP and RIP, advertises a large number of routes, and simulates complex IGP topology to test protocol functionality, scale, and performance
- Emulates both IBGP and EBGP advertising large number of routes to stress test DUT performance and policy control, as well as importing real internet routes to validate DUT performance under real internet routing table
- BFD emulates heartbeat sessions along with routing protocols to validate quick failure detection and failover recovery to ensure minimum interruption on network failure
- BGP FlowSpec emulation validates DDoS mitigation as well as policy enforcement in SDN networks at scale with flow match and actions.
- Flexible action sets simulate dynamic network condition with routing sessions and routes flapping to validate the stability and robustness of the implementation handling abnormal behavior of internet network.
- Running multiple protocols simultaneously over one or multiple ports along with line-rate traffic to simulate real network condition
- Emulates Link Aggregation with LACP bundle or static bundle to qualify routing protocols and traffic over LAG
- Emulates Micro-BFDv4/v6 on individual member links of an LACP LAG to validate faster failure detection and failover of both control and data traffic running over the LAG.
- Supports IPv6 version of above-mentioned routing protocols to test IPv6 control and data plane performance and mixed v4/v6 support to ensure IPv6 readiness of core network
- Emulates PIM-SM/SSM, IGMP/MLD querier and receiver to qualify multicast infrastructure forwarding and replicating multicast traffic
- Emulates NTP client to validate NTP server function and scale/performance to support large number of NTP clients
- Packaged RFC 2554, 2889, 3918 QuickTest to benchmark data forwarding performance of routing and switching devices and end-to-end networks

Routing

930-2004

IxNetwork, Optional Software, Multicast Emulation, includes IGMPv1/v2/v3, MLDv1/v2, PIM-SM/SSMv4/v6, and Multicast VPN support; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2005

IxNetwork, Optional Software, BGP4 Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2007

IxNetwork, Optional Software, BGP4 Emulation with additional IPv6 support; REQUIRES 930-2005 BGP4 emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2008

IxNetwork, Optional Software, OSPFv2 Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2009

IxNetwork, Optional Software, OSPFv3 Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2010

IxNetwork, Optional Software, IS-IS Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2011

IxNetwork, Optional Software, IS-IS Emulation with additional IPv6 support; REQUIRES 930-2010 IS-IS emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2012

IxNetwork, Optional Software, RIPv2 Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2013

IxNetwork, Optional Software, RIPng IPv6 Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2020

IxNetwork, Optional Software, EIGRP Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2023

IxNetwork, Optional Software, BFD Emulation for use with OSPF, BGP, or ISIS; REQUIRES either 930-2008 OSPFv2 Emulation, OR 930-2009 OSPFv3 Emulation, OR 930-2005 BGP4 Emulation, OR 930-2006 BGP4 Emulation with Layer 3 MPLS/VPN & Multicast VPN Support, OR 930-2007 BGP4 Emulation with IPv6 support, OR 930-2010 IS-IS Emulation, OR 930-2011 IS-IS Emulation with IPv6 support. REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2035

IxNetwork, Optional Software, LACP IEEE 802.3ad Protocol Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2051

IxNetwork, Optional Software, Protocol emulation over IEEE 802.3ad (LACP); REQUIRES 930-2035 LACP IEEE 802.3ad Protocol Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2067

IxNetwork, Optional Software, IGMP/MLD Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2068

IxNetwork, Optional Software, PIM-SM/SSM Emulation; Includes PIM-SM/SSMv4/v6 and Multicast VPN emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2097

IxNetwork, Optional Software, LISP MS/MR and xTR Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

BGP Flowspec emulation

930-2121

IxNetwork, Optional Software, BGP FlowSpec Emulation; REQUIRES 930-2005 BGP4 Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

Bundles

930-2001

IxNetwork, Optional Software Bundle, IPv4 Routing Protocols; includes 930-2005 BGP-4 Emulation, 930-2008 OSPFV2 Emulation, 930-2010 IS-IS Emulation, 930-2012 RIPV2 Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2002

IxNetwork, Optional Software Bundle, IPv6 Routing Protocols; includes 930-2007 BGP4 with IPv6 Support, 930-2009 OSPFv3 with IPv6 Emulation, 930-2011 IS-IS IPv6 Support, 930-2013 RIPng Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076) and 930-2001 Optional Software Bundle, IPv4 Routing Protocols; includes Media Kit

Switching

930-2017

IxNetwork, Optional Software, STP/RSTP Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2018

IxNetwork, Optional Software, MSTP Emulation; REQUIRES 930-2017 STP/RSTP Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2055

IxNetwork, Optional Software, Spanning Tree protocol emulation per VLAN (PVST); REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076) AND 930-2017 STP/RSTP Emulation

930-2126

IXIA IxNetwork, Optional Software, Network Time Protocol (NTP) Emulation (930-2126); REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

QuickTest

930-2022

IxNetwork, Optional Software, RFC2544 and Custom Integrated Tests over Advertised Topologies; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2401

IxNetwork, Optional Software, RFC 2889 QuickTest; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2403

IxNetwork, Optional Software, IP Multicast RFC 3918 QuickTest; REQUIRES 930-2067 IGMP/MLD Emulation (or 930-2004 IxNetwork Multicast Emulation); REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2409

IxNetwork, Optional Software, Asymmetric Data Performance QuickTest; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

Keysight enables innovators to push the boundaries of engineering by quickly solving design, emulation, and test challenges to create the best product experiences. Start your innovation journey at www.keysight.com.
